

Experimental Programs for  
Choi and Lee (2012), “Communication, Coordination and Networks,”  
forthcoming to JEEA

The experimental program was made with z-Tree program developed by Fischbacher (2007).

There are two programs for experimental treatments: `choi4.ztt` and `baseline.ztt`.

- `Choi4.ztt` is a z-Tree program for the treatments with communication: Complete, Star, Kite and Line Networks with both  $T=2$  and  $T=5$ .
- `Baseline.ztt` is a z-Tree program for the baseline treatment without communication.
